

Dear FCC,

I am an XM Satellite Radio subscriber. It is the only radio I listen to. If you prevent XM from broadcasting certain types of services I will be denied important services and my right to choose. After all, is more information not better than less.

Please do not sell out to the commercial radios who bring nothing to me and all the other satellite radio listeners. They only want to limit competition.

Reject the NAB's petition 04-160.

Sincerely,

Justin Westbrook
